

## *Confined Control Redefined*

# *SS-15i*

|                                     |                               |
|-------------------------------------|-------------------------------|
| <i>24-inch fan</i>                  | <i>120 or 230 volt power</i>  |
| <i>4 cleanable filtered nozzles</i> | <i>Oscillating option</i>     |
| <i>.25 gpm average water flow</i>   | <i>VFD pump option</i>        |
| <i>45 feet of throw</i>             | <i>Multi unit arrangement</i> |
| <i>Average 10 micron droplet</i>    |                               |

The Spraystream SS-15i is the newest in Air One's line of defense against dust and odors in confined areas. The ability for the SS-15i to control very fine particulate and odor in smaller spaces is unparalleled by any other apparatus on the market today. The SS-15i uses less than a quarter gallon a minute of water and can send a stream of very fine mist up to 45-feet from the front of the unit. Coupled with oscillation, each SS-15i can cover over 5,000 square feet of area. With the addition of a dosing pump to add surfactants and/or deodorizers, there is little the SS-15i can not do in smaller transfer stations and recycling centers
