

18-inch 2.2 kW fan	230 V/60HZ/30AMP/1PH
16 cleanable filtered nozzles	Offroad cart option
1.0 gpm average water flow	VFD pump option
75 feet of throw	Remote control option
Average 10 micron droplet	1000 psi high pressure pump

Expanded Control Redefined

SS-25C

The Spraystream SS-25C is the newest in Air One's line of defense against dust and odors in larger indoor and smaller outdoor areas. The ability for the SS-25C to control very fine particulate and odor is unparalleled by any other apparatus on the market today. The SS-25C uses less water, power and equipment than our competitors and can send a stream of very fine mist up to 75-feet from the front of the unit. Coupled with oscillation, each SS-25C can cover over 7,500 square feet of area. Add a wheel kit and the unit can be transported anywhere over any terrain. With the addition of a dosing pump to add deodorizers, there is little the SS-25C can not do for your job requirements.
