

18-inch 2.2 kW fan	230 V/60HZ/30AMP/1PH
16 cleanable filtered nozzles	Oscillating option
1.0 gpm average water flow	VFD pump option
75 feet of throw	Remote control option
Average 10 micron droplet	1000 psi high pressure pump

Expanded Control Redefined

SS-25i

The Spraystream SS-25Ci is a custom solution to your dust and odor control requirements. Designed for use in larger indoor and smaller outdoor areas, the SS25i can be tailored to your needs. The ability for the SS-25i to control very fine particulate and odor is unparalleled by any other apparatus on the market today. The SS-25i uses less water, power and equipment than our competitors and can send a stream of very fine mist up to 75-feet from the front of the unit. Coupled with oscillation, each SS-25i can cover over 7,500 square feet of area. Additional units can be installed for even greater coverage and expanded control.
